

“ I first saw the Clear Touch™ panels at a conference, and I could instantly envision it: no more tripping over wires, ducking to avoid casting shadows, turning off the lights, or climbing ladders to replace expensive bulbs. ”

STACY ROYSTER
Technology Coordinator, Opelika City Schools

Document 6000U Series Specifications. 062017

TO OUR VALUED CUSTOMERS:

At Clear Touch Interactive®, we began our journey with one thing in mind: You. And the goal of every decision along the way has been to make classroom interactions easier for teachers and students—the ones who actually use our products every day. Too often, new technology companies focus exclusively on the technical specifications of their products, the what of their products, while forgetting about the why. We never want to get so caught up in the business of running our business that we neglect the people we're working for in the first place.

That's why we've created the simplest, most intuitive, interactive panels on the market and why we offer the strongest service team of any of our competitors. Clear Touch Interactive® is proud to be an American-owned and operated company in a time when many businesses are choosing to outsource their support services. We employ regional sales, service, and technical support representatives, which means that you can get in touch with us quickly with your questions and service requests. More importantly, it means that we can respond quickly. Whatever you need, we are here for you. That's our promise.

Thank you again for your valuable feedback and engagement over the years. We love to hear from our customers and learn more about how you are using our panels. We wouldn't be the company we are today without you.

Sincerely,

Clear Touch Interactive®

EXPERIENCE THE NEXT GENERATION OF INTERACTIVE PANELS

Our new 6000U Series interactive panels come in a variety of sizes to meet the audio and visual requirements of your room.

FULL VIEWING EXPERIENCE

Available in 55", 65", 70", 75" & 86"

BEST-IN-CLASS TEACHERS DESERVE BEST-IN-CLASS TOOLS

Interactive displays are powerful educational tools that support whole class instruction, student-led discussions, small group collaboration, and individual learning—easily transitioning between multiple roles in the classroom.

Over the last decade, interactive displays have become increasingly popular in schools by empowering educators to interact at a deeper level than ever before. Of course, there are other classroom technologies that allow teachers to present material or even provide some limited interaction, but none are as comprehensive as Clear Touch Interactive® panels.

Can Interactive Displays collaborate with one-to-one devices?

Yes! Interactive displays are an even better purchasing decision for schools that have already invested in classroom sets of personal devices such as laptops, tablets, and smartphones. Here’s why.

While these devices can be fantastic learning tools, they are designed for individual learning, not for collaboration. In fact, students sitting at their desks working on a laptop or touch screen are really no different than students sitting at their desks reading or filling out worksheets—the medium is different but the result is the same. Low level interaction and limited educational value.

However, with the purchase of a Clear Touch Interactive® display, teachers can easily turn these personal devices into collaborative devices. The large, crystal-clear interactive display acts as a hub for classroom interaction while our integrated software suite allows students to connect wirelessly with their personal devices and allows both students and teachers to share what’s on their screens.

“We wanted to continue our district’s forward momentum with cutting-edge technology. From my experience in the tech industry, I knew the Clear Touch panels would do that.”

DAN MARAKOWSKI
District Technology Coordinator for Clayton Public School District New Jersey

What About Interactive Whiteboards or Projectors?

Both interactive whiteboards and interactive projectors share the same primary limitation: the reliance on bulbs to project the content.

Projection technology creates shadows, hotspots, and screen glare, making lessons more difficult to see from every corner of the classroom. Plus, bulbs become dimmer over time until they are replaced and the images they project fade drastically in bright light, which means teachers often have to dim the lights, or turn them off completely, in order to teach.

Do you remember when your teacher used to turn off the lights to use the overhead projector? Most students viewed this as an invitation to take a quick nap. A lot has changed in the 21st Century classroom, but your students have not. Low lighting means less engaged students.

Other Considerations for Switching to Clear Touch™:

IMAGE QUALITY

Projectors typically have low quality image resolution and sharpness. Combined with shadows and glare from the projector bulb, as well as the shadow from the projector itself, the lower resolution can present a true obstacle to student engagement. Plus, Interactive projectors throw an image onto a wall or another surface not designed for projection, making visibility even worse.

EASE OF USE

Most interactive whiteboards and interactive projectors support just one point of touch, and both devices are usually mounted to the wall or ceiling, which means teachers are rooted to one spot in the classroom. However, Clear Touch™ panels were built with the end user in mind. No long training sessions needed; no worrying whether students can read the screen from a distance. Intuitive gesture technology like pinch and zoom, as well as a variety of panel sizes and accessories, stands and wall mounts, allows you to interact with our panel with ease.

TOTAL COST OF OWNERSHIP

Although projection technology is less expensive upfront than interactive displays, the cost to run and maintain an interactive whiteboard or projector might surprise you. Between energy usage, bulb replacement, and other maintenance, projector-based technologies can quickly cost more than interactive displays. Plus, interactive displays have a much greater lifespan than even the best projectors. With Clear Touch Interactive displays you get:

- No expensive bulb replacements
- No calibration required
- No filters to clean or maintain
- Lower power consumption
- No drivers to update or maintain
- Estimated 50,000+ hours of service life

KEY FEATURES

Features with Educational Benefits

Clear Touch Interactive® displays come standard with plenty of technical features, like LED backlit panels and a dual core CPU—but the features that matter the most to teachers are the ones that have a noticeable impact on student engagement and learning outcomes.

20 Points of Simultaneous Touch

Touch is perhaps the most beneficial feature of any interactive display, making it a powerful educational tool built for interactivity and collaboration. Our panels support touch on all applications - including Mac OS, as well as the ability to use the touch screen and write with the pen at the same time.

When there is too much lag time between when the teacher drags an item across the board and when it follows, or if the teacher tries to circle a key concept and the writing feature is off, the display becomes less useful. Clear Touch Interactive® displays feature a cool, smooth-glide surface that is 99% accurate and responds to touch in milliseconds. It truly is a joy to have in class.

More Connectivity

Providing multiple inputs and outputs is about more than greater connectivity and better opportunities for collaboration. It's about convenience and reliability, too. Every teacher knows that sinking feeling of showing up to class with a well-thought out lesson plan only to have your educational technology difficult to manage. The updated side panel on the 6000U Series features multiple USB ports and multiple HDMI inputs as well as one HDMI output so you can connect with ease. Of course, you can always connect wirelessly with any external device.

Familiar Interface

The 6000U Series uses the simple, familiar Android 5.1 Operating System with 2GB of RAM and 16GB of ROM built-in. Plus, each of our new panels arrives pre-loaded with the Clear Touch™ Store, a branded, streamlined Android app store that lets you get the application you need directly on your panel screen with one touch. All of our products are easy to set-up and begin using, so teachers can walk up to the board and immediately begin interacting with the panel.

Open Architecture

Clear Touch™ offers a full suite of built-in software programs that do not require yearly licensing fees. Prefer to use your own software and programs? The 6000U Series fully supports third-party applications of your choosing. No need to be locked into a specific program; you choose what to use on the panel.

SOFTWARE

The freedom to choose your software. And no annual license fees with our software.

Choose your software, or ours, or use both. Our standard educational software suite is included with every panel purchase and, unlike most of our competitors, never requires a yearly license. Applications also come with additional free resources, such as the Snowflake MultiTeach Community which allows teachers to download and share resources online. Together, our suite of software enables teachers to do everything they need to do to run their classroom effectively, including lesson creation and presentation, content capturing, collaboration and screen sharing, and quick, informal assessments.

EasiNote

ANNOTATE YOUR LESSONS AS YOU TEACH

Turn your Clear Touch panel into an interactive whiteboard with one click. Teachers love EasiNote because it looks and behaves like the traditional whiteboards and interactive whiteboards that they are already used to—with lots of additional features and benefits that make teaching easier. For example, with EasiNote, teachers can open a whiteboard to write notes for their students, scroll up or down on an infinite canvas, and export their notes as a PDF that students can reference later. Or, they can take an existing web page, Powerpoint, or other Multimedia presentation and write on top of it, annotating points for the students and interacting with the content in real-time using simple, intuitive hand motions. With special features like write to text, built in subject tools, and built-in presentation tools, EasiNote is ideas for whole class instruction.

EasiConnect

CONNECT DEVICES & MANAGE CONTENT WIRELESSLY

Our EasiConnect software connects your computer or your mobile device to the panel, giving users the freedom to control their Clear Touch Interactive® display from a distance. Effectively, EasiConnect turns your tablet into a slate with pen tools, mouse clicks, and a keyboard. Users also have easy access to common control features such as advance slide, scroll, pinch to zoom, and swipe. The EasiConnect app enables teachers to walk around the classroom when presenting, without the hassle of returning to the front of the class to switch inputs or interact with their lesson content.

EasiCapture

BUILD A LIBRARY OF RECORDED LESSONS

EasiCapture integrates well with the other products in our software suite. Combined with DisplayNote, EasiNote or Snowflake, for example, EasiCapture makes it simple for teachers to record their instruction and prepare video content for their classes. To begin, all teachers do is launch the program they plan to use that day, then launch EasiCapture, and press record on the floating toolbar. Users can choose to capture all of the screen, part of the screen, or to capture the screen as well as their teaching using a connected webcam. When finished, teachers can use EasiCapture's built-in quick edit tools to preview, clip, and add practical effects like zooms and transitions before saving the video for future use.

EasiRemote

UNPARALLELED ACCESS TO YOUR CLASSROOM TECHNOLOGY

Keep your entire school, or your entire district, informed and on the same page with EasiRemote. Our exclusive software allows remote management and troubleshooting for network administrators, making it easier to solve technical problems internally. School principals and superintendents can manage all of the Clear Touch Interactive displays in their system from their own computer, sending information organization-wide at the touch of a button. Simply login to the program, type your message, and hit send—the message will display on every interactive panel in your network simultaneously. EasiRemote is the ideal application for morning announcements, emergency announcements, district-wide policy reminders, new initiatives, and much more.

Here's What's Included:

Snowflake MultiTeach

LEARNING JUST GOT A LOT COOLER

Snowflake MultiTeach is a robust suite of over 30 off-the-shelf software apps for touchscreens. Many of these apps, such as the Organs app, the Math Bugs app, and the Animals app contain preset content that busy teachers can use right out of the box as a warm-up to a lesson, as review, or as a rewarding game after a busy day. Plus, with the Lessons app, teachers can use templates and import contents such as video, sound effects, images, and text to create customized, interactive lessons that are as simple or as complex as the subject at hand. Building lesson plans that engage students and promote hands-on learning has never been a more organized or uncomplicated process.

DisplayNote

SCREEN SHARE FROM ANYWHERE

All teachers aim to create an immersive, student-centered learning environment, but getting there is easier said than done. DisplayNote is a screen mirroring and collaboration software that makes creating interactive, student-centered presentations faster, simpler, and more intuitive, allowing your students to connect and contribute to your presentation, and collaborate with each other, from their own devices (10 connections included). The software even remotely connects homebound students and offsite presenters. So go ahead and flip your classroom. Your students will be happier and more engaged, you'll have fewer classroom management issues, and you'll foster an environment where actual learning is taking place.

ACCESSORIES

Complete your Clear Touch™ package all in one place.

All of our Clear Touch™ products, including accessories, are available from the nation's leading channel partners and integrators and professionally installed by our partner network of technicians. Check out the Clear Touch Capital™ program (page 14) to find out more about bundling products, accessories, and installation as well as onsite warranties, into one streamlined financing process.

ADJUSTABLE STANDS & MOUNTS

More active, mobile classrooms that combine multiple learning styles into one lesson improve student engagement, student retention and classroom management—but all teachers know that switching between activities can be tricky and eat up valuable class time. Adjustable stands and mounts enable you to quickly transform your classroom from whole class instruction to small group learning and back again without missing a beat. Our mobile stands are mounted on a C-shaped base, which allows your students to get closer to the board and helps you navigate around desks and other classroom furniture with ease.

Convertible Mobile Stand (STAND-CONM)

FEATURES

- Supports 55"–86" Clear Touch Interactive® Panels
- Electrical powered stand makes adjustments simple
- Has a quiet electrical motor
- Tapered base provides greater accessibility for all users
- Fully adjustable height & angle
- Optional shelf available (pictured, mouse and keyboard not included)

FIXED STANDS & MOUNTS

Safety is always first. Every Clear Touch Interactive® panel comes with our very own steel constructed fixed wall mount. Made specifically for our panels, both the wall mount & stand ensure that each panel is secure, preventing falls, damage and injuries.

Fixed Mobile Stand (STAND-FIXM)

FEATURES

- Supports 55"–86" Clear Touch Interactive® Panels
- Strong and sturdy, supporting up to 300 lbs
- Convenient shelving for your other devices
- Three different height settings for different applications

DIMENSIONS & WEIGHT

Product weight 81 lbs
Shipping weight 99 lbs
Shipping size 60"x26"x5"

WARRANTY

90 day replacement warranty

Fixed Wall Mount (MOUNT-FIXW)

FEATURES

- Supports all Clear Touch Interactive® Panels
- No additional cost (included with all panels)
- All solid metal construction prevents bowing & warping
- Supports up to 300 lbs

DIMENSIONS & WEIGHT

Product weight 13 lbs
Shipping weight 14 lbs
Shipping size 40"x11"x3"

WARRANTY

90 day replacement warranty

INCLUDED WITH EVERY PANEL

ACCESSORIES

PC Modules

Clear Touch Interactive® displays offer optional onboard PC modules to enhance the power and the convenience of your panel. You can include these modules as part of your original purchase or choose to upgrade your panel at a later date. Installation is simple—slide the module into the built-in slot, attach the panel backing, and you're ready to go!

The Benefits of Embedded Computing

Since all of our interactive displays can wirelessly connect to multiple external devices simultaneously and support multiple operating systems, an onboard computer is truly optional. However, the modules are nice to have, particularly for schools that want teachers to be able to share panels or be able to operate without a dedicated laptop. With an onboard computer, your school will be able to:

MAKE SET-UP SIMPLER

Choosing the PC modules standardizes and simplifies the process for your IT department. This PC is easily PXE bootable over your network so you can do it yourself. Or Clear Touch™ offers to load programs for an additional service cost.

SERVICE OR UPGRADE YOUR COMPUTER MODULE WITH NO DOWNTIME

With a removable, onboard computer, maintenance is easy. No need to move the entire interactive panel just to fix the computer module. Should you ever need to repair or upgrade the computer, simply take out the PC module and send it in for servicing. While you're waiting for the maintenance to be completed, connect wirelessly with your laptop or tablet or use another PC module and continue your lesson plans as schedule.

PC MODULE WITH Intel® Core™ i5 & Ultra HD Display (PCMOD-25)

- INTEL® CORE™ i5 PROCESSOR**
Offering powerful processing optimized for multimedia applications
- 8GB DDR4 MEMORY**
High speed memory provides responsive experience
- 120GB SDD STORAGE**
High speed storage for rich multimedia content
- INTEGRATED INTEL™ HD GRAPHICS**
Ultra HD display delivering 2160p resolution

PC MODULE WITH Intel® Core™ i7 & Ultra HD Display (PCMOD-27)

- INTEL® CORE™ i7 PROCESSOR**
Offering powerful processing optimized for multimedia applications
- 16GB DDR4 MEMORY**
High speed memory provides responsive experience
- 240GB SDD STORAGE**
High speed storage for rich multimedia content
- INTEGRATED INTEL™ HD GRAPHICS**
Ultra HD display delivering 2160p resolution

BRIDGING THE FINANCIAL GAP

Clear Touch Capital™

Clear Touch Interactive® is here for customers from the initial purchase through installation and initial training to ongoing training and support—and we now provide our own flexible financing to make it even easier to become a Clear Touch™ customer.

Our new suite of financial products is exclusively for Clear Touch™ customers. We offer competitive, fixed-payment and fixed-rate loan and lease structures for organizations of all sizes, ranging from individual schools that need a couple displays to large school zones implementing a district-wide technology upgrade.

In addition, we tailor our products, and our repayment options, to be as convenient as possible for our customers. We offer tax-exempt municipal loans, taxable loans, and operational leases. Our loan terms start at 24 months, and we can allow for skip payments and seasonal payments so that you can match your repayment plan to your fiscal year.

Manage your organizational budget with a competitive loan or lease arrangement from Clear Touch Capital™. If you're considering purchasing new Clear Touch™ panels or upgrading your existing technology, ask us for a proposal that includes financing.

INSTALLATION

As a 100% American owned and operated business, we take immense pride in the quality of our made to order products and service.

Clear Touch Interactive® and our partners work with our customers through installation, training and ongoing customer support to make sure that you're properly set up and getting the most out of your interactive displays.

The Application & Approval Process

Once you've decided to purchase Clear Touch Interactive® displays and accessories for your school, the application and approval process is simple:

STEP 1
Consultation, Proposal and Application

Your representative will sit down with you, take your application, ask you some questions, and help you determine which of our financial products is the best fit for your organization. Your leasing or financing proposal will include disbursement and repayment terms. You will then review and approve a final proposal.

STEP 2
Credit Evaluation and Approval

Clear Touch Capital™ representatives will review and approve your credit application.

STEP 3
Documentation and Funding

In the final step, we close the deal and handle all of the documentation, progress payments, and final funding.

All of our Clear Touch Capital™ products cover everything you will need to get started with your new Clear Touch Interactive® displays, including installation, set-up, training, and software or hardware upgrades. Talk to your representative today to find out if one of our competitive, convenient, all-in-one financial products is right for you.

SIMPLE INSTALLATION, POWERFUL RESULTS

Interactive whiteboards, projectors, and smart panels can all have costly, disruptive, and time-consuming installations and ongoing maintenance fees that can burden your organization. Some even require a heavy leveraging of your IT department for constant configuration and reconfiguration, or construction crews to tear apart classrooms to install wiring for your interactive whiteboard or projector. Clear Touch interactive® panels, on the other hand, are a superior technology solution that are up and running in a matter of a few hours, and our professional technicians handle the entire installation process for you!

Clear Touch interactive displays provide unparalleled technological power, functionality, and performance for your school. As a leading collaborative technology solution, Clear Touch interactive® displays give your teachers an edge as they are creating new lessons, presenting content, or collaborating with students—all without hassle, steep learning curves, or disruption of their classroom.

Techno-phobe or techie? Clear Touch Academy™ is here for you.

NOTES
