Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The concentration of the *Agrobacterium* suspension was 10⁶ cells/ml (A), 10⁷ cells/ml (B), 10⁸ cells/ml (C), and 10⁹ cells/ml (D). The transformation efficiency was determined by the number of transformants per 10⁶ cells of the *Agrobacterium* suspension. The data are the mean \pm SD of three independent experiments.

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group was divided into two subgroups: the control group and the experimental group. The experimental group was divided into two subgroups: the control group and the experimental group. The control group was divided into two subgroups: the control group and the experimental group. The experimental group was divided into two subgroups: the control group and the experimental group.

J. Fitzgerald

H^y Miller's Subdivision

of part of Las Animas Ranchlot No 34

Resurveyed January 1891 by
Herrmann Bros
SUEYORS & C.

Note: The resurvey and re-recording of the Subdivision was made necessary, because the first survey made at time of sale by Mr. Frazer was found to be incorrect, and because the plat as recorded fails to give proper data and monuments.
